Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

1-135. Claims 1-19 and 50-57 drawn to a composition comprising an enzyme selected from residues 300-650 of SEQ ID NO:267 or the 67 sequences listed in claim 17, a kit, a method of cleaving a nucleic acid using the enzyme and a method for production an altered enzyme of the sequences listed in claims 46-47, classified in class 435, subclass 199, 91.1 and 440.

136-203. Claims 20-23, drawn to a composition of a nucleic acid of one of the 67 sequences listed in claim 21, classified in class 536, subclass 12.2.

The inventions are distinct, each from the other because:

The products of groups 1-135 and groups 136-203 are drawn to completely different chemical compounds which are patentably distinct. The enzymes or nucleic sequences of the indicated SEQ ID Nos are structurally different and therefore are not a proper Markush group. Therefore, these claims are restricted not involved in an election of species. Applicant must choose only 1 of the sequences for groups 1-135 and 1 for groups 136-203.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
